

Photizo® Physiotherapy

The Photizo® Physiotherapy unit was designed specifically with physiotherapists and other pain management specialists in mind, and allows treatments within minutes. It boasts a 150 mW small probe for treating small or difficult to access areas, while the optional high-power 1200 mW probe provides you with a greater treatment surface for treating large areas. This allows you to treat a patient's dorsal aspect within less than 10 minutes.

This unit may also be bought by members of the public for home care.

The following treatment protocols are available on the Photizo® Physiotherapy:

- Wounds
- Sinus
- Acne
- Wrinkles
- Joints
- Muscular.

This product comes with a two-year carry-in warranty from the date of purchase, provided original proof of purchase is presented.
